CINDERVOID

QUICK CHARACTER COMPENDIUM, OR QCC

The Core Elements of forging a character shaped by divine Sparks, inherent Essence, Bloodline Roots, personal Attunements/Achievements, and the scars that mark your Evolution are laid out in 5 Steps.

Step 1: Choose Your Bloodline

Your **Bloodline** defines your inherent racial traits, passed down through generations. It grants unique benefits and challenges that shape your very being.

- **Innate Boon:** A natural advantage or bonus your Bloodline provides, often to your Attunements.
- **Innate Drawback:** A specific challenge or penalty inherent to your Bloodline. Every Bloodline carries one.
- **Root Ability:** Unique capabilities granted by your heritage, often reflecting your Bloodline's nature or connection to Jinx.
- **Level Adjustment:** This number indicates how many **Essence Advantages** you gain beyond your current Character Level. For example, a Bloodline with a Level Adjustment of +2 means you gain Essence Advantages as if you were 2 levels higher to Start ONLY! Does not affect your actual Character Level!
- **Attunement Bonuses:**
    - **HP Bonus:** This bonus is added to your initial HP roll only. Your initial HP roll is Based on a D20 roll with a floor of 8+ applicable Bloodline Bonus
    - **Starting Jinx:** Determines your initial pool of Jinx, the resource for your Spark Powers. it's based on a D4 Roll and your Starting Jinx detailed by your chosen Bloodline.
    - **Attack Prowess:** The die used for all your attack rolls (e.g., D8, D10, D12).
    - **Defense Prowess:** The die used for all your defense rolls (e.g., D6, D8, D10).

Step 2: Forge Your Essence

Your **Essence** is your character's fundamental origin or path, less about divine power and more about their innate nature and background.

- **Essence Advantages:** Each Character Level grants you an Essence Advantage. These are unique abilities tied to your Essence, Your Bloodline's Level Adjustment applies HERE.
- **Starting Package:** Your chosen Essence determines your initial items and starting currency (Embers, Shards, Lumen, Obelisks, Gems).
- **Weapon Proficiency:** Your Essence often grants proficiency within a specific type. Using a weapon that you are untrained in makes you take penalties to all attack rolls while wielding.

Step 3: Ignite Your Spark

Your **Spark** represents your connection to a divine source, The Flame. It grants you powerful, Jinx-consuming Powers.

Initial Powers: Begin by picking 2 Spark Powers from your chosen Spark. You can choose any power for which you meet the prerequisites.

- **Multi-Spark:** At **Character Level 10**, you unlock the ability to Multi-Spark. To do so, you must have learned *every* Spark Power in your initial Spark before choosing a new one. You can Multi-Spark again at **Character Level 15** and **Level 20**.

Step 4: Attune Your Being

Your **Attunements** define your main capabilities and how you interact with the world.

- **HP (Hit Points):** Your starting HP is determined by a D20 roll plus your Bloodline's starting HP. Re-roll anything under 8.
- **Movement (Strides):** Movement is measured in **Strides** across a grid map, where each square is 5ft x 5ft.
    - **1 Stride = 6 Squares (30ft)**
    - **Land Stride:** 1 Stride (30ft)
    - **Air Stride:** 2 Strides (60ft) (Requires flight ability)
    - **Water Stride:** 0.5 Stride (15ft) (Unless specialized)
- **Stats (the *MAIN* Attunements):** You have 15 points to assign as you see fit to your Main Attunements. An average mortal has a 2 in each category.
    - **Might (MGT):** Physical power, melee damage.
    - **Celerity (CEL):** Agility, reflexes, ranged damage.
    - **Resilience (RES):** Endurance, damage reduction, resistance to effects.
    - **Cognition (COG):** Intellect, knowledge, magical capacity.
    - **Aura (AUR):** Presence, charm, social influence, luck, chance, etc.

Step 5: Experience Your Evolution

Your **Evolution** tracks your character's growth through experience and the choices you make during gameplay.

- **Level Progression (XP):**
    - To reach Level 2: 500 XP
    - To reach Level 3: 2,000 XP
    - To reach Level 4: 4,500 XP
    - To reach Level 5: 8,000 XP
    - To reach Level 6: 10,500 XP
    - To reach Level 7: 12,000 XP
    - To reach Level 8: 14,500 XP
    - To reach Level 9: 17,000 XP
    - To Reach Level 10: 20,000 XP
- **Gaining Experience:**
    - **Combat Encounters:** XP awarded based on the Difficulty Rating (DR) of the encounter. (e.g., DR 1 = 100 XP, DR 5 = 500 XP).
    - **Boss Level Fights:** XP isn't based on any standard DR here. (Avg. 500XP)
    - **Discoveries & Roleplaying:** The DM may award bonus XP (25-100 XP) for significant discoveries, exceptional roleplaying, or achieving personal goals.
